/sensors/latest - Last 10 readings per location

/alerts - GET active/POST acknowledge

OpenAPI 3.0 documentation

5. Dashboard

Grafana:

Real-time sensor gauges

Historical trends (configurable windows)

Alert heatmap by location

Role-based access (operator/admin)

6. Non-Functional Requirements

Availability: 99.95% SLA

Latency: <2s dashboard updates

Security: RBAC at all layers

Compliance: Meets ISO 5667 water monitoring standards

code

Copy

Would you like me to:

1. Add detailed deployment diagrams

2. Include cost estimates per component

3. Specify hardware requirements for edge devices

4. Focus more on any particular subsystem?

ME

Member11:15 AM

Task: Research and select MQTT broker. Assigned to @Arun. Due: next week.

Decision: Which time-series DB should we use? Options: InfluxDB, TimescaleDB, QuestDB. Let's discuss and decide.

Odin AI Active

FEATURE	STATUS	EVIDENCE
Garage view	PASS	Tabs (All, Artifacts, Files, Research, Pinned, Recent)
Artifact creation (API)	PASS	5 artifacts created (Document, Diagram, Table, Code, Chart)
Artifact types (17)	PASS	DOCUMENT, DIAGRAM, TABLE, CODE, CHART, etc.
Artifact display in Garage	BUG	API returns 5 artifacts, but Garage shows empty
Artifact side panel	BUG	Cannot open — artifacts not loading in frontend

Root cause: The frontend artifact store isn't loading artifacts from the API. The API endpoint works correctly (returns 5 artifacts), but the frontend fetch is failing silently. This needs investigation.

3 — Settings

FEATURE	STATUS	EVIDENCE
Account settings	PASS	Profile management (name, email, save)
Appearance settings	PASS	Theme preference

AI settings (BYOK)

NOT
SHOWN

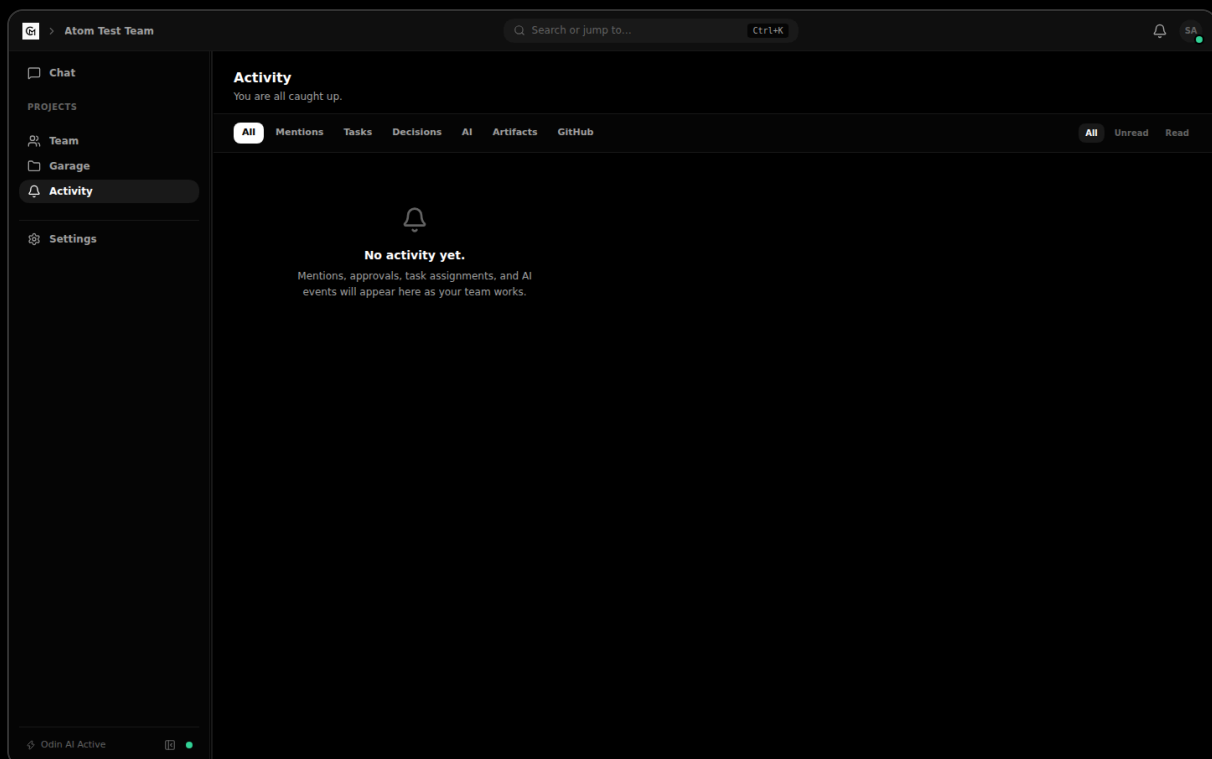

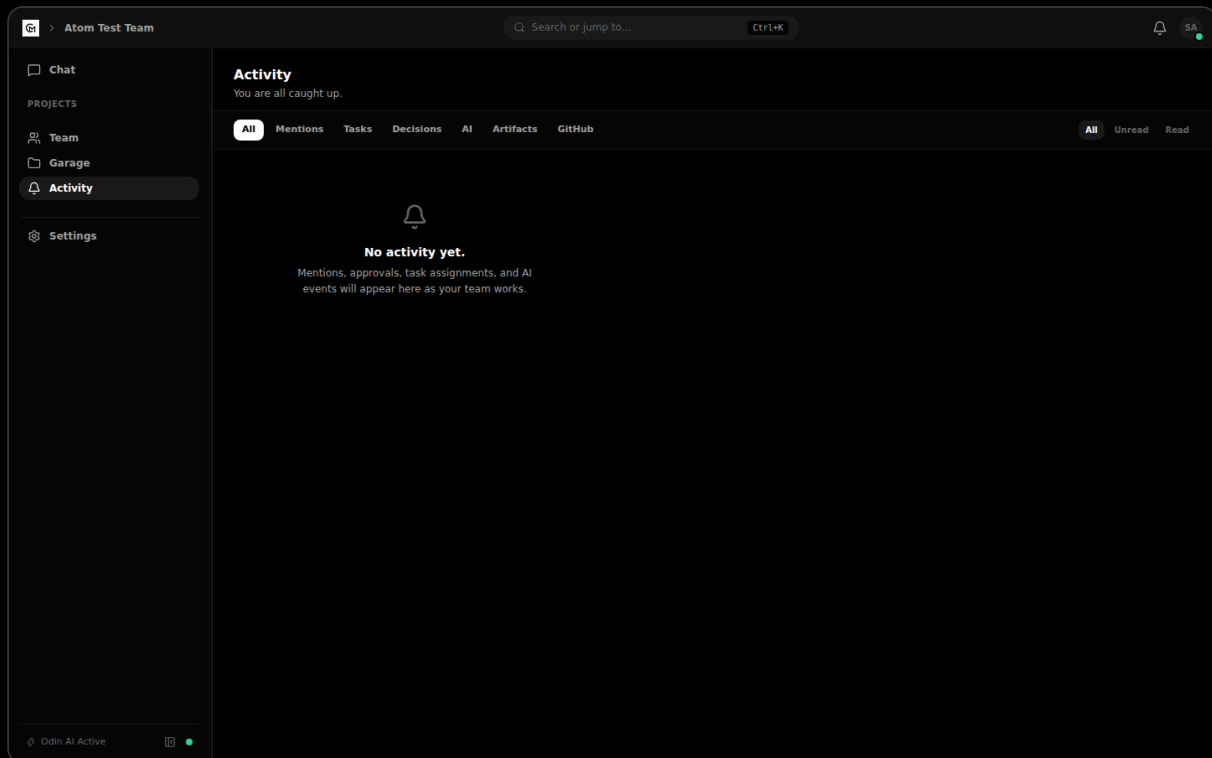

Section exists but not visible in UI (role-gated)

Members
management

NOT
SHOWN

Section exists but not visible in UI

4 — Other Screens

FEATURE	STATUS	EVIDENCE
Activity feed	PASS	Activity view captured
Team view	PASS	Team view captured

Notifications	EMPTY	No notifications in test data
Tasks view	NOT CAPTURED	Needs separate verification
Decisions view	NOT CAPTURED	Needs separate verification

5 — Backend API Verification

ENDPOINT	STATUS	EVIDENCE
POST /api/v1/groups	PASS	Group created
POST /api/v1/invites/:token/accept	PASS	3 members joined
POST /api/v1/projects	PASS	Project created
POST /api/v1/groups/:id/messages	PASS	13 messages sent
PATCH /api/v1/messages/:id	PASS	Message edited
POST /api/v1/messages/:id/reactions	PASS	Reaction added
GET /api/v1/groups/:id/messages/search	PASS	4 results for "sensor"
POST /api/v1/groups/:id/ai/runs	PASS	4 AI runs completed
POST /api/v1/projects/:id/artifacts	PASS	5 artifacts created
GET /api/v1/projects/:id/artifacts	PASS	Returns 5 artifacts

6 — Issues Found

ISSUE	SEVERITY	DESCRIPTION
Artifact loading in Garage	HIGH	API returns artifacts but frontend shows empty. Silent fetch failure.
Settings sections not visible	MEDIUM	AI, Members, Skills sections exist but not showing (role-gating issue)
Slash commands	LOW	Trigger needs refinement
Client versions null	LOW	Env vars not set in wrangler.toml
