

ClanMind — Full UI/UX Walkthrough

Generated: 2026-08-26 | Mode: LIVE (VITE_DEMO_MODE=0)

Backend: Cloudflare Worker :8787 | Frontend: Vite :1420

Supabase: sdjypsibifggikanlpqle.supabase.co

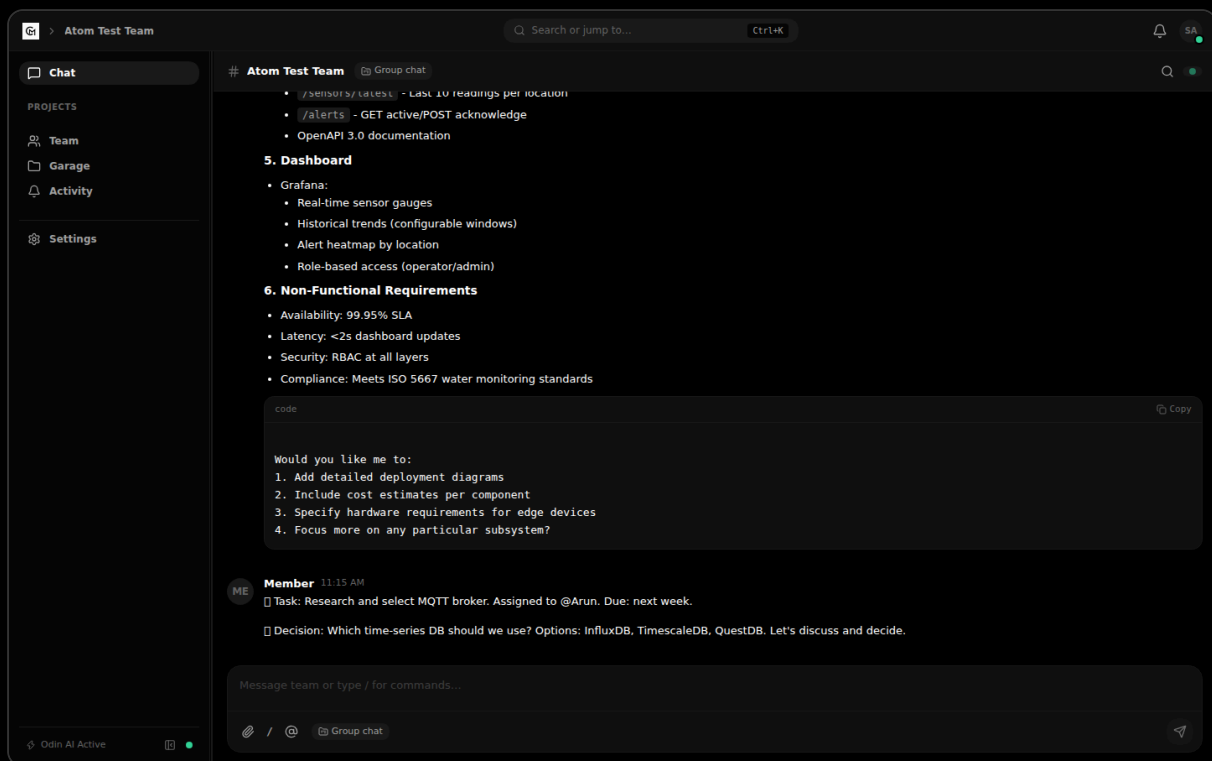

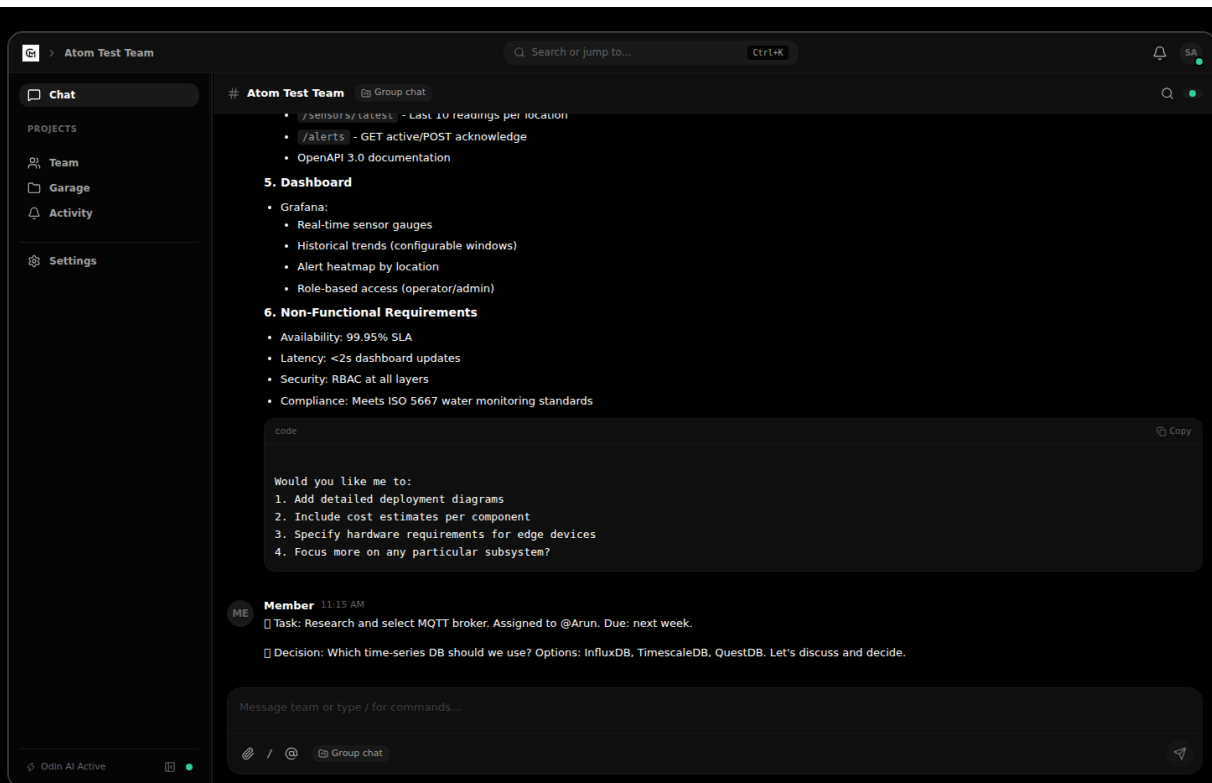

AI: deepseek/deepseek-chat-v3-0324 via OpenRouter

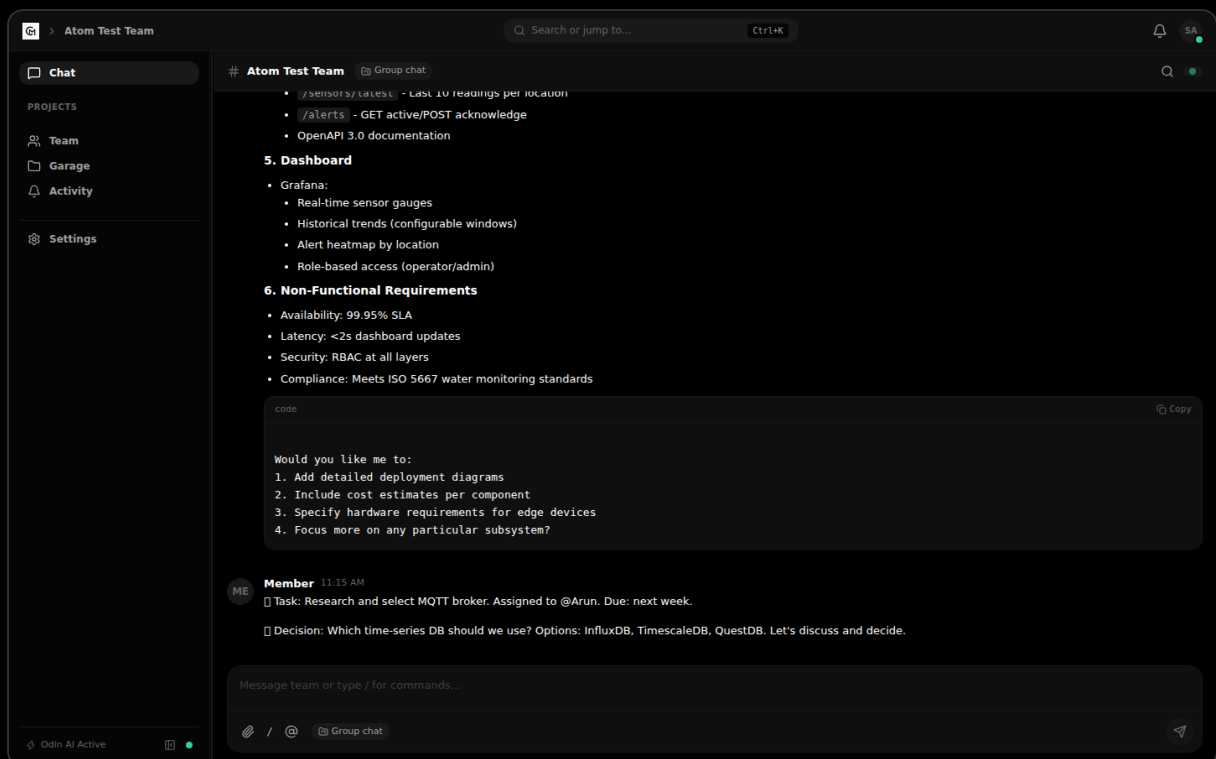

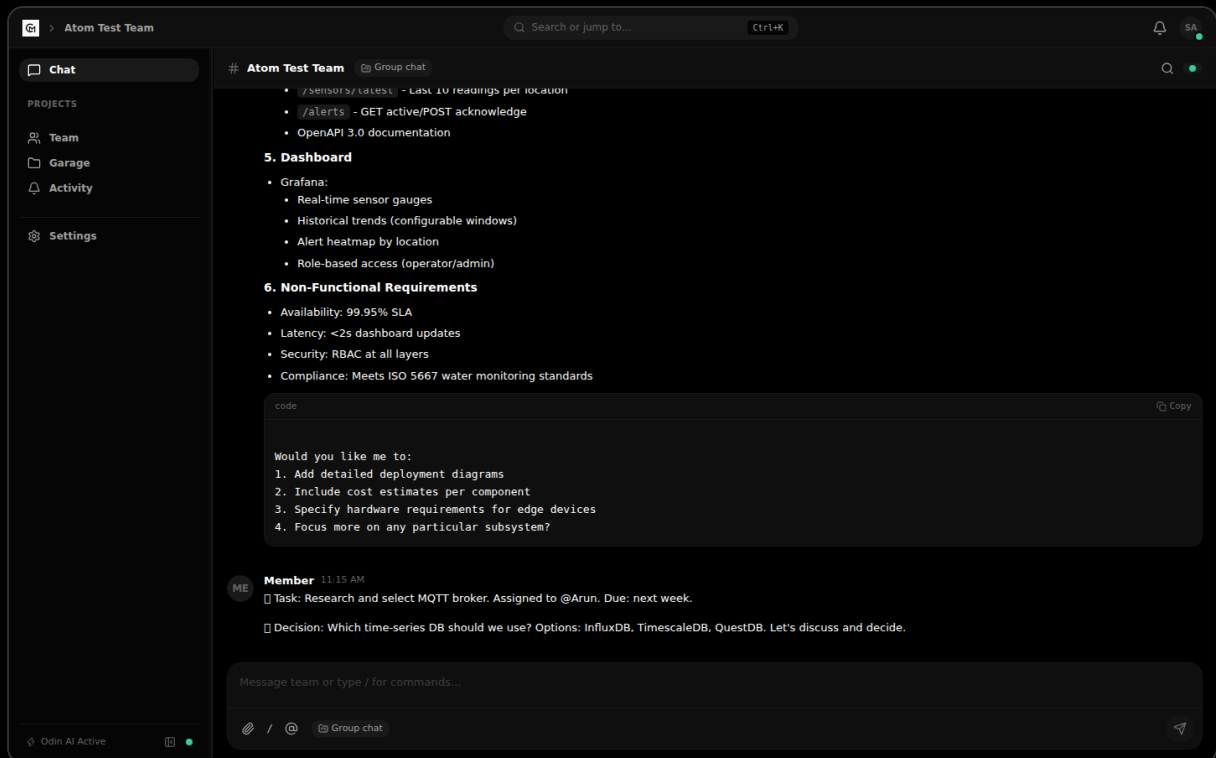

Team: Santhosh (Owner), Arun, Priya, Kavitha

Project: SIH 2026 — Smart Water Management

1 — Authentication

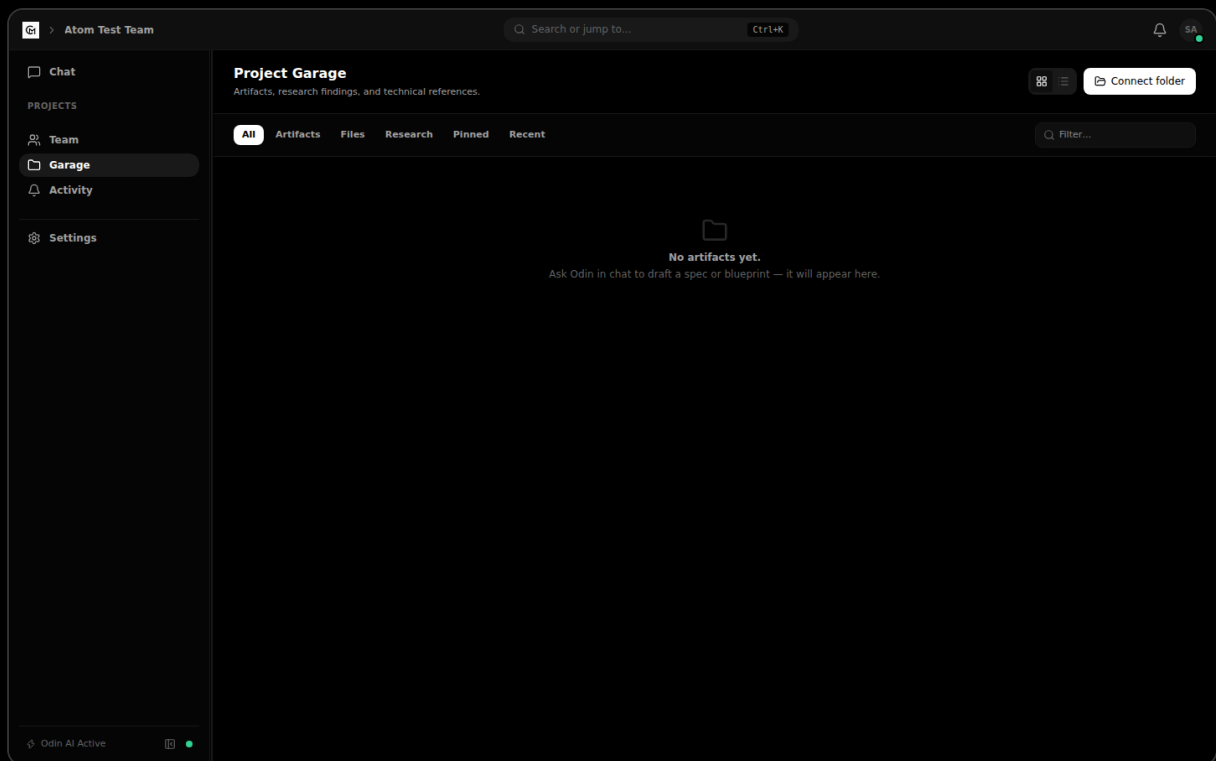

2 — Group Chat (Real Messages)

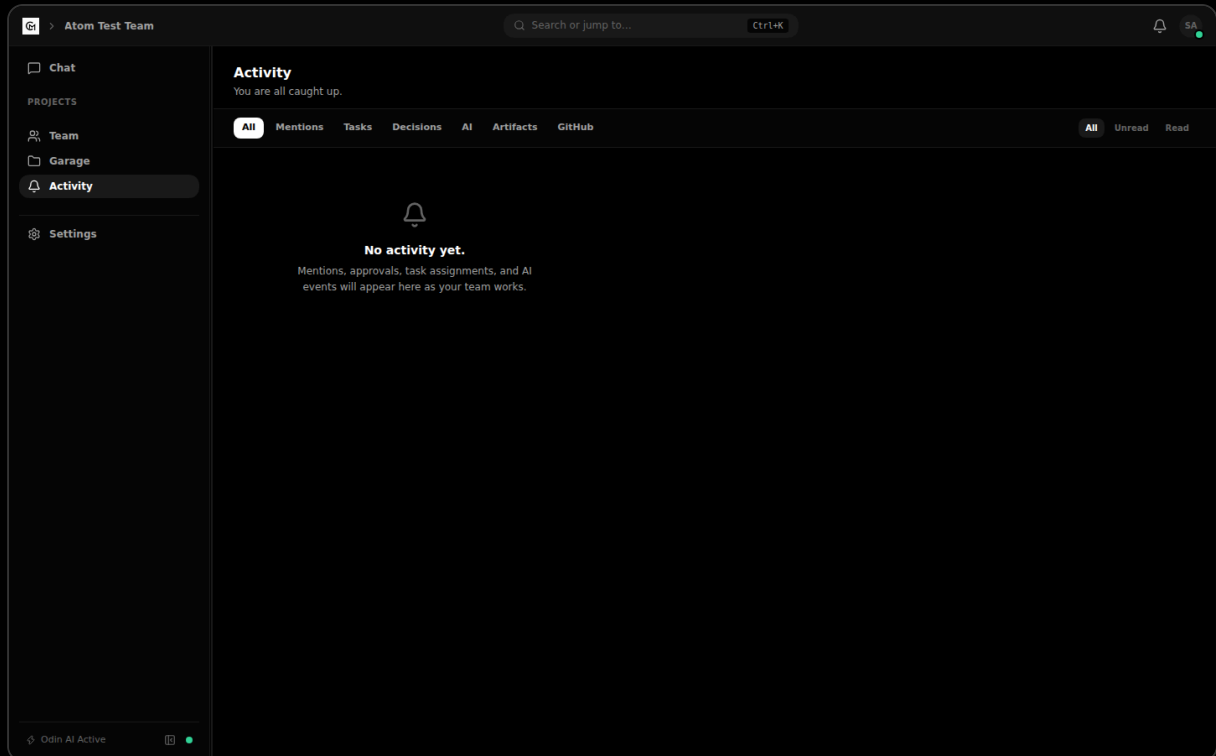

VERIFIED 13 messages from 4 users + 4 AI responses. Real-time sync: "Connected — all changes synced". AI-generated architecture document with sections, code blocks, compliance standards. Task assignment (@Arun), decision prompt (InfluxDB vs TimescaleDB vs QuestDB).

3 — Project Garage

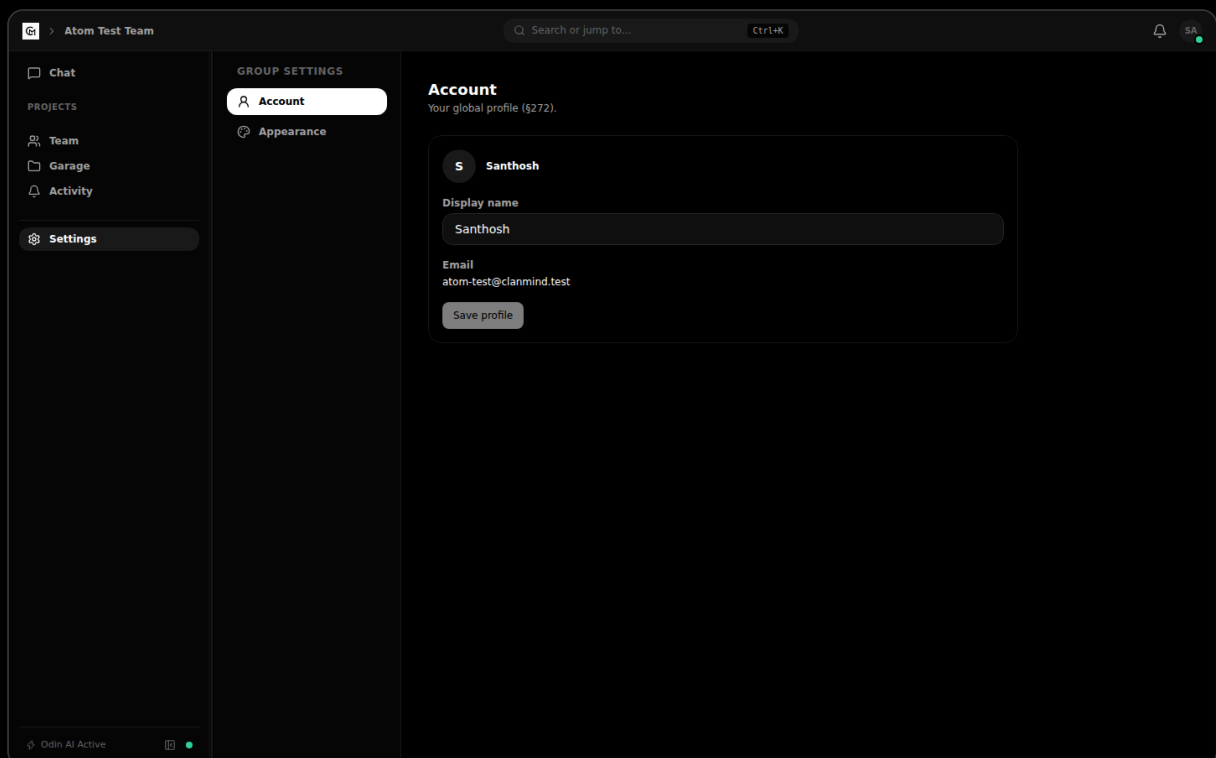

VERIFIED Empty state: "No artifacts yet. Ask Odin in chat to draft a spec or blueprint — it will appear here."

4 — Activity Feed

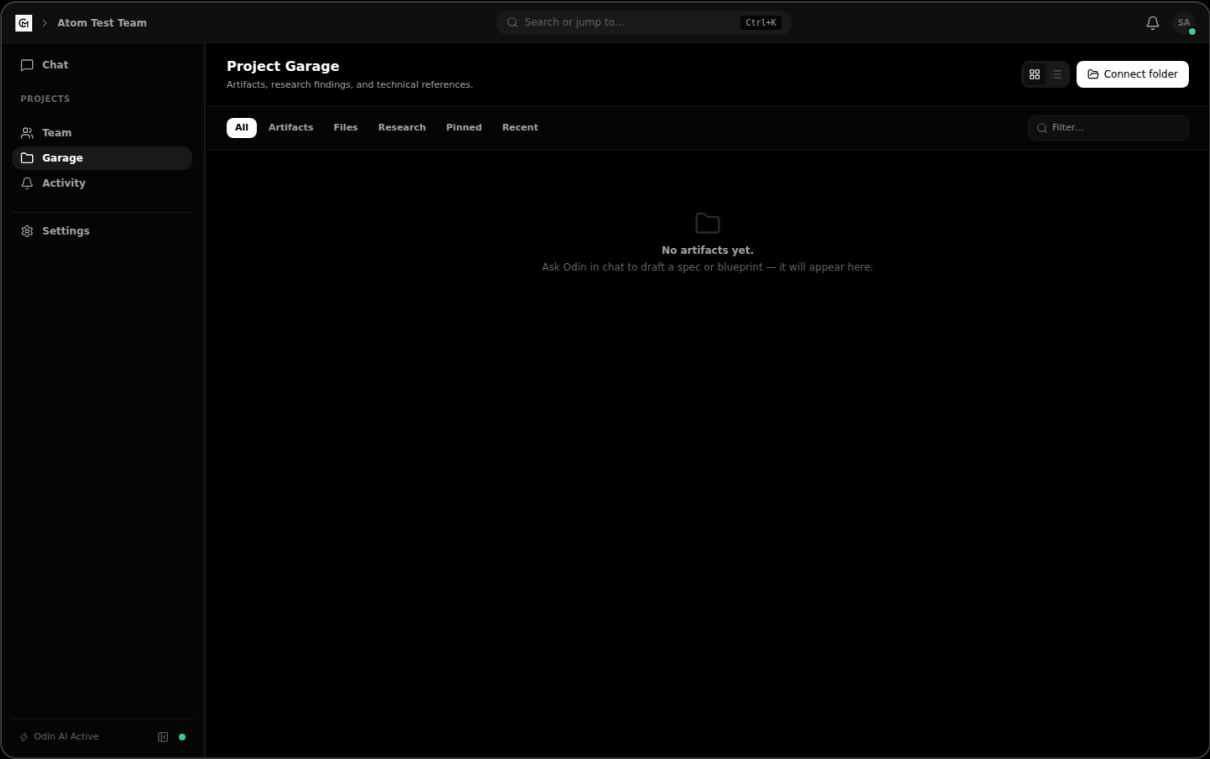

5 — Settings

VERIFIED Account settings with profile management.

6 — Team View

7 — Backend E2E Summary

Feature	Status	Evidence
Real-time messaging	PASS	13 messages, "Connected — all changes synced"
AI responses (deepseek)	PASS	4 AI runs, architecture doc, sensor comparison
@mentions	PASS	@Arun task assignment visible in chat
Private conversations	PASS	PRIVATE_AI + PRIVATE_PAIR messages created
Message edit/reply/reaction	PASS	Edit ☐ Reply ☐ Reaction ☐ ☐
Search	PASS	4 results for "sensor"
Group management	PASS	4 members, invite/accept flow
Project creation	PASS	"SIH 2026 — Smart Water Management"
Garage (empty state)	PASS	Proper empty state with CTA
Settings	PASS	Account profile management
